

Access Agreement to Perform Soil Sampling, Interior Dust sampling, and Water Sampling

The United States Environmental Protection Agency (EPA) is conducting further investigations of the lead contamination at the Washington County Lead District Superfund Sites in order to evaluate the risks posed by historical mining activity in the area. As part of this evaluation, the EPA needs to look at the lead levels found in surface soils, home interior dust, and drinking water at a number of residential properties. Your assistance in this investigation will provide critical information in determining the risks posed by potential lead contamination. Black and Veatch Special Projects Corp. (BVSPC) is under contract with the EPA to assist in the determination of levels of lead and other metals in surface soils, home interior dust, and drinking water within the Washington County Lead District Sites. Your cooperation is requested in giving BVSPC/EPA permission to access your property for the purpose of collecting soil, dust, and water samples in support of this investigation. Contact Bruce Morrison at the EPA, (913) 551-7755, for further information.

AUTHORITY FOR ENVIRONMENTAL RESPONSE ACTIONS

The activities to be implemented by EPA under this agreement are pursuant to Section 104 of CERCLA, 42 U.S.C. 9604. EPA's right of access to the property in Section 104(e) of CERCLA, 42 U.S.C. 9604(e) provides entry for "determining the need for response, or choosing or taking any response action under this title, or otherwise enforcing the provisions of this title."
